

# ROMAN SENYK

Expert Front-end developer | React.js | Next.js | Vue.js

@ romansenyk2@gmail.com    LinkedIn/Portfolio    Ivano-Frankivsk, Ukraine

## SUMMARY

I'm a passionate and experienced Front-End Developer with 5+ years of expertise in building modern, user-friendly, and high-performing web applications. I specialize in React, Next.js, and Vue.js, and have a proven track record of delivering scalable, responsive, and maintainable code for both startups and established businesses.

I strive to create engaging user experiences with a focus on performance, accessibility, and modern web practices. I am also adept at collaborating with UX/UI designers to bring concepts to life, ensuring that every design decision is implemented beautifully and efficiently.

## SKILLS

HTML5	CSS3	JavaScript
TypeScript	React	Redux
Node.js	Vue.js	Next.js
Tailwind CSS	MongoDB	
Nuxt.js	WordPress	

## EDUCATION

**Bachelor Degree of Computer Science**  
**Lviv Polytechnic National University**  
09/2013 - 06/2017  
Lviv, Ukraine

**Master Degree of Computer Science**  
**Lviv Polytechnic National University**  
09/2017 - 06/2019  
Lviv, Ukraine

## STRENGTHS

**Front-end development expertise**  
Skilled in building responsive web applications using React.js, Vue.js, and Next.js.

## EXPERIENCE

**Internship**  
**IntexSoft**    10/2019 - 07/2020    Kharkiv, Ukraine

- Collaborated on 5 major projects involving React.js and Next.js, totalling 10,000+ lines of code.
- Optimized web applications, reducing loading times by 30% for enhanced user experience.

**Software Engineer**  
**TechMagic**    10/2020 - 10/2024    Lviv, Ukraine

- Reduced page load time by 30% through optimizing React components and implementing lazy loading.
- Managed front-end development for 15 web applications using a team of 5 developers.
- Enhanced customer satisfaction scores by 20% by pioneering responsive design implementations.
- Enhanced user engagement by 40% by revamping the UI/UX design utilizing Tailwind CSS and responsive design principles.

## MY PROJECTS

### ANSWEAR online store

06/2021 - 01/2022  
<https://answear.ua>

ANSWEAR.ua is an online store offering a wide selection of women's, men's, and children's clothing, footwear, and accessories. The platform features original global brands, including premium, sports, and lifestyle labels.

- As a Frontend Developer, I focused on developing and optimizing web applications, leveraging React to create dynamic user interfaces and React Router for seamless client-side navigation. I utilized Akamai to ensure high-performance content delivery and reliable caching. Additionally, I incorporated Lodash to streamline data manipulation and implement functional programming techniques effectively.

### Club Med website

10/2019 - 03/2020  
<https://www.clubmed.ua/>

Club Med is a global provider of all-inclusive resorts, offering vacation packages that include accommodation, meals, entertainment, and various recreational activities. They cater to families, couples, and individuals seeking luxury, relaxation, and adventure.

- In my role as Senior Frontend Developer, I was responsible for building and optimizing high-performance web applications, employing Next.js for server-side rendering and Apollo Client for smooth state management. I incorporated GraphQL to facilitate scalable data retrieval and utilized Tailwind CSS to develop adaptable and efficient styles. I also relied on TypeScript for strong type checking and code maintainability.

## STRENGTHS

### Proficient in JavaScript

Strong understanding of modern JavaScript frameworks and libraries for efficient coding.

### User interface design skills

Ability to create intuitive user interfaces with CSS3 and Tailwind CSS.

### Back-end integration knowledge

Experienced in integrating and managing data with Node.js and MongoDB.

## MY PROJECTS

### MODIVO online fashion store

📅 02/2021 - 11/2021

🔗 <https://modivo.ua/>

MODIVO.ua is an online fashion store offering a wide variety of clothing, footwear, and accessories for men, women, and children. The platform features premium and popular global brands and offers seasonal collections, sales, and promotions.

- In my capacity as a Full Stack JavaScript Developer, I was entrusted with the design and maintenance of web applications, employing Vue.js and Nuxt.js to create efficient and dynamic frontends, alongside Node.js for backend processing. My work involved utilizing Tailwind CSS for streamlined, responsive styling and integrating core-js to guarantee seamless functionality across a variety of browsers, thereby enhancing the user experience.

### EnglishHome online store

📅 02/2022 - 10/2022

🔗 <https://englishhome.ua/>

EnglishHome.ua offers a variety of home textiles, including bedding, towels, blankets, and accessories. The platform provides a wide selection of high-quality products designed to enhance comfort and style in living spaces.

- As a Frontend Web Developer, I designed and implemented responsive web applications, using Vue.js to craft dynamic user interfaces. I optimized application performance by managing assets and build processes with Webpack, ensuring faster loading times. In addition to leveraging jQuery for legacy support and DOM manipulation, I utilized core-js to maintain cross-browser compatibility. I also managed Nginx configurations to ensure efficient frontend delivery, contributing to a smooth and optimized user experience.
